ance Notes on Codes and Abbreviations" appearing at the begin-  
ning of each regular issue of the PCT Gazette.

(54) Title: THERMOSTATIC SAFETY VALVE

(57) Abstract: A thermostatic safety valve (20) including an inlet (21), an outlet (28) and a flow path extending between the inlet and outlet. A thermostatic element (30) is disposed in the flow passage and reactable to expand or contract relative to the temperature of liquid flowing past it. A shut off device (29) is movably positioned to restrict flow of liquid through the flow passage and is movable with the thermostatic element (30) to restrict flow of liquid through the outlet (28) when the temperature of liquid received through the inlet (21) exceeds a predetermined temperature.
